

Stage 1 screens 10 questions and sizes the Stage 2 frame: 150,000 random plus rare-class enrichment, inverse-probability weighted.

THE AUDIT DECIDES WHAT p MEANS

- question asked
- gate not opened
- coded CRIS label
- human label
- record a person opens
- p
- log scale, 0.001 to 1
- * fixed, never trained
- the only fitted object in the pipeline
